**Experiment-6:**

**1)**List the type of the courses “Statistics” and “Programming”

```
mysql> select Ctype from course WHERE Cname in ('statistics', 'programming');
+------------+
| Ctype      |
+------------+
| manadatory |
| Manadatory |
+------------+
2 rows in set (0.00 sec)
```

2)The instructor wants to know the CourseNos whose scores are in the range 50 to 80

```
mysql> select C_No from studentmarks WHERE score BETWEEN 50 and 80;
+------+
| C_No |
+------+
| C001 |
| C002 |
| C003 |
+------+
3 rows in set (0.00 sec)
```

3)Find the average mark of “C002”

```
mysql> select AVG(score) as Avgscore from studentmarks where C_No='C002';
+----------+
| Avgscore |
+----------+
|  57.5000 |
+----------+
1 row in set (0.00 sec)
```

4) List the maximum, minimum mark for “C002”

```
mysql> select MAX(score), MIN(score) from studentmarks where C_No='C002';
+------------+------------+
| MAX(score) | MIN(score) |
+------------+------------+
|         78 |         37 |
+------------+------------+
1 row in set (0.00 sec)
```

5)List the maximum, minimum, average mark for each course

```
mysql> select MAX(score), MIN(score), AVG(score) from studentmarks GROUP BY C_name;
+------------+------------+------------+
| MAX(score) | MIN(score) | AVG(score) |
+------------+------------+------------+
|         68 |         48 |    58.0000 |
|         78 |         37 |    57.5000 |
|         80 |         80 |    80.0000 |
+------------+------------+------------+
3 rows in set (0.00 sec)
```

6)List the name of the courses and average mark of each course.

```
mysql> select C_name, AVG(score) as Avgscore from studentmarks GROUP BY C_name;
+------------------+----------+
| C_name           | Avgscore |
+------------------+----------+
| Computer science |  58.0000 |
| Biology          |  57.5000 |
| Commerce         |  80.0000 |
+------------------+----------+
3 rows in set (0.00 sec)
```

7)Calculate the sum of all the scores.

```
mysql> select SUM(score) as Total_Score from studentmarks;
+-------------+
| Total_Score |
+-------------+
|         311 |
+-------------+
1 row in set (0.00 sec)
```

8)How many students are registered for each course? Display the course description and the number of students registered in each course.

```
mysql> select C_name, Count(S_id) from studentmarks GROUP BY C_name;
+------------------+-------------+
| C_name           | Count(S_id) |
+------------------+-------------+
| Computer science |           2 |
| Biology          |           2 |
| Commerce         |           1 |
+------------------+-------------+
3 rows in set (0.00 sec)
```

9)How many courses did each student register for?

```
mysql> select S_id, count(C_name) from studentmarks GROUP BY S_id;
+------+---------------+
| S_id | count(C_name) |
+------+---------------+
|  101 |             1 |
|  102 |             1 |
|  103 |             1 |
|  104 |             1 |
|  105 |             1 |
+------+---------------+
5 rows in set (0.00 sec)
```
